E|-----
```

### (Part 1)

**Am**                      **Em**  
When we were young  
**G**                      **D**                      **Am**                      **Em**    **G**    **D**  
There were always creatures lurking under the bed  
**Am**                      **Em**                      **G**                      **D**  
A thousand year old dragon lived deep in the lake  
                    **Am**                      **Em**  
And he said don't be afraid  
                    **G**                      **D**  
So you dove in

### (Pre-chorus)

**Am**                                              **C**  
He seemed so sweet and lovely he made you laugh  
                                    **G**                                      **D**  
and made you forget about the rain  
                    **Am**  
Showed you new tricks on guitar  
                    **C**                                              **D**    (variação entre **D\***, **D**)  
Hidden talents that erases the pain, aah

### (Chorus)

**C**                      **G**                      **D**    (variação entre **D\***, **D**)  
And don't you know that there's a wolf stalking in sheep's clothing  
**C**                      **G**                      **D**    (variação entre **D\***, **D**)  
Tells me he's the real thing  
                                    **C**                                      **G**  
Think what your life would be missing  
                    **D**                                      **Am**    (variação entre **Am\***, **Am**)  
If you didn't have him to sing, to sing about

### (Part 2)

**Am**                      **Em**                      **G**                      **D**                      **Am**                      **Em**                      **G**                      **D**  
Three headed monsters they want your money wanna be in the picture be your friend  
**Am**                      **Em**    **G**                      **D**                      **Am**                      **Em**                      **G**                      **D**  
They fill your pool with alligators are they all just jokers or are they cruel

### (Pre-chorus)

**Am**  
They light up when they see you  
                    **C**                                              **G**                                              **D**  
Like there's no where else that they'd rather be than by your side  
                    **Am**  
Then they promise you the stars  
                    **C**                                              **D**    (variação entre **D\***, **D**)  
But they're really just along for the ride, aah

## Sarah McLachlan

### (Chorus)

And don't you know that there's a wolf stalking in sheep's clothing  
Tells me he's the real thing  
Think what your life would be missing  
If you didn't have him to sing, to sing about

Aah, aah...

e|--6---6---8---8---10---10---10---11--|--6---6---8---8---10---10---11-----  
B|---0---0---0---0---0---0---0---0---|--0---0---0---0---0---0---0-----  
G|-----  
D|-----  
A|-----  
E|-----

### (Part 3)

Is it the sparkle in their eyes or the knowledge of the ways of the world  
The way they kiss the way they hold you  
Has made you blind to the fangs and the fire

### (Chorus)

And don't you know that there's a wolf stalking in sheep's clothing  
Tells me he's the real thing  
Think what your life would be missing  
If you didn't have him to sing, to sing about

Aah, aah...
